CAREER OBJECTIVE

AI & Data Science undergraduate with hands-on experience in Machine Learning, Computer Vision, Generative AI, and Python-based API development. Experienced in building AI-driven applications using Python, FastAPI, Tensorflow, OpenCV, and LLMs with a strong interest in AI automation, intelligent systems, and production-oriented AI solutions.

EDUCATION

Bachelor of Technology – Artificial Intelligence and Data Science

September 2023 - Present

Anna University Regional Campus; GPA: 8.53

Coimbatore, Tamil Nadu

RELEVANT COURSEWORK

Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Artificial Intelligence, Machine Learning, Deep Learning, Computer Networks

WORK EXPERIENCE

AI Intern | Flofly Technologies - Bengaluru

June 2026 – July 2026

Developed an AI-powered drone navigation system as part of an engineering-focused AI project. Applied AI/ML and computer-vision techniques and contributed to the development of the system, improving operational efficiency by 15%.

Data Science Intern | Sangam Soft Solutions - Coimbatore

June 2025 – July 2025

Executed data preprocessing and exploratory analysis on large datasets, applying machine learning to uncover insights that informed business decisions.

TECHNICAL SKILLS

Programming Languages: Python, SQL

AI / Machine Learning / Generative AI : Machine Learning, Deep Learning, Generative AI, LLMs, Prompt Engineering, Predictive Analytics, Computer Vision, RAG, LangChain, LangGraph

Frameworks & Libraries: TensorFlow, Scikit-learn, OpenCV, Pandas, NumPy, Matplotlib

Backend & APIs: FastAPI, Flask, REST APIs

Databases: MySQL, SQLite

Developer & Deployment Tools: Git, GitHub, Docker, Kubernetes

PROJECTS

AI – Powered Readme Generator

May 2026 – June 2026

Built an AI-powered README Generator using Python, FastAPI, Prompt Engineering, and LLMs to automate project documentation.

AI - Based Dropout Prediction and Counselling System

January 2026 – April 2026

Gradiora is a production-ready, institutional SaaS platform that detects student risk across academic, emotional, and financial dimensions using explainable AI. It enables faculty and counsellors to deliver timely, structured interventions while preserving student privacy and preventing stigmatization.

Emotion Detection System

September 2025 – October 2025

Developed a real-time Emotion Detection System using Deep learning (CNN), TensorFlow, and OpenCV to classify facial expressions into multiple emotional categories.

CERTIFICATIONS

- NPTEL – Introduction to Large Language Models
- Microsoft Learn - Explore Generative AI
